

Table 3. Suspended sediment yield (SSY), specific suspended sediment yield (sSSY), and disturbance ratio (DR) from disturbed portions of Upper and Lower subwatersheds for the storm events in Table 2.

	Upper ^a	Lower	Total
Fraction of subwatershed area disturbed (%)	0.4	10.1	5.2
SSY (tons)	17.0	112.2	129.2
Forested areas	16.9	14.9	31.7
Disturbed areas	0.1	97.3	97.5
% from disturbed areas	0.9	87	75
sSSY, disturbed areas (tons/km ²)	41.0	1095.0	1053.1
DR for sSSY from disturbed areas ^b	2	58	56

a. Disturbed areas in Upper are bare areas from landslides.
b. Calculated as (sSSY from disturbed areas)/sSSY from Upper (17.0 tons/km²)
